Experience

Google

March 2022 — Present
Software Engineer, *Travel Search Experience*, Current, Belo Horizonte.
Developing new Travel related features on Google Search, like new Transportation features and revamping the current experience for travel destinations queries (e.g. Paris).
This work mainly involves development for Search's front and backend servers, analysis over Search usage metrics and user logs and understanding of Search quality.

August 2019 — February 2022
Software Engineer, *Assistant on Search*, 30 months, Belo Horizonte.
Created features integrating Google Assistant to Google Search and promoting personalization.
- Reminders: Added reminders functionalities to Google Search so users can set reminders for answers within Search. This involved development on Search's front and backend, on Search's Android App and experimentation/analysis over Search usage metrics and user logs.
- Personalized data: Created two new personalized data sources compiled from Search's personalized and aggregated data on offline pipelines and served them through Search's online serving infrastructures.

January 2018 — June 2018
Software Engineering Intern, *Search Explore*, 6 months, Belo Horizonte.
Created a new feature on Google Search to boost trending entities on lists of entities related to the user's query in order to improve user exploration on Search. This involved development on Search's backend server and offline Flume pipelines.
